

ABSTRACT

A tax refund system is disclosed in which in exchange for a taxpayer assigning all or a portion of his or her tax refund, a participating provider provides to the taxpayer a spending vehicle with buying power at participating outlets. Tax return data for an individual's tax return is processed by the IRS. A taxpayer consents to using a portion of the tax return data to acquire a spending vehicle from a financial institution of the taxpayer's choosing. Using a portion of the tax return data, the IRS arranges to electronically transfer an amount related to the taxpayer's refund to an account at the financial institution selected by the taxpayer. A taxpayer then receives a spending vehicle such as a credit, debit, or cash card, spending account, coupon, or rebate from a financial institution or other spending vehicle provider such as a retailer, service provider, wholesaler, distributor, or entertainment entity.
